

# International Protection of Industrial Designs under the Hague System

04.27.15

An industrial design generally constitutes the ornamental or aesthetic aspects of various articles, such as the three dimensional features (e.g., shapes) or two dimensional features (e.g., patterns, lines or colors) of packages, containers, furniture, household goods, lighting equipment, jewelry, electronic devices, and textiles. Industrial designs can be protected in many countries by a design patent.... [Continue Reading](#)
