

Changes to Outpatient Evaluation and Management (E/M) Guideline

Friday, October 23, 2020 / 12:00 p.m. (CDT)

10.23.20

On October 23, Shareholder [Corinne Smith](#) will moderate a coding webinar titled, "Changes to Outpatient Evaluation and Management (E/M) Guidelines," which will cover the significant changes to outpatient E/M services that will go into effect on January 1, 2021. The webinar will also discuss best practices and elaborate on information that is critical for healthcare attorneys, accountants and medical professionals to understand as they navigate healthcare compliance issues, false claims and reimbursements.

Is your practice ready for coming changes to E/M coding? The Centers for Medicare & Medicaid Services (CMS), Current Procedural Terminology (CPT) and American Medical Association (AMA) will implement significant changes to outpatient evaluation and management (E/M) services as of Jan. 1, 2021. The revised coding guidelines for E/M services represent the first major overhaul to E/M reporting in over 25 years. Since E/M visits comprise approximately 40% of allowed charges for most physician practices, understanding the upcoming changes to E/M coding is critical. This information is critical for healthcare attorneys, accountants and medical professionals to understand as they navigate healthcare compliance issues, false claims and reimbursements. Join us for this webinar highlighting key changes to the E/M codes and outlining best practices to be ready for the changes.

This webinar is approved for CPE and CLE credits.

Date: Friday, October 23, 2020
